STEP 5.3: TRIGGER REVIEW

Step 5.3: Trigger review

Both activations and missed activations present a valuable opportunity to learn from and improve the triggering process and threshold, especially for formalized frameworks and / or s/EAPs. Questions developed by the Climate Centre and university partners for activations and missed events are available in the [toolbox](#) as well as example reports based on these templates. These questions can be answered during a dedicated session of the lessons learned workshop or other post-activation review processes, as applicable.
